Profile

CS Undergraduate at VIT-AP specializing in AI/ML. Skilled in MERN stack development and data engineering with experience designing AI-driven scraping pipelines, mobile apps, and scalable backend architectures. Proven leader in cross-functional teams with a focus on technical innovation.

Education

VIT-AP University Sept 2023 - June 2027 (Expected)
B.Tech in Computer Science (AI & ML)
GPA: **8.9** (6th Semester)
Relevant coursework: Web Development, DBMS, Software Engineering, UI/UX Design, SQL, Machine Learning, Digital Image Processing, ML & RL.

Delhi Public School South, Bengaluru 2021-2023
Physics, Chemistry, Mathematics, Biology
Percentage: 88%

Experience

Data Engineer Intern (Ambitio) 21 May 2025 - 21 July 2025
https://ambitio.club/ | Letter of Completion

- Developed multiple **data scraping pipelines** using Selenium, Playwright, and APIs to automate data collection and integrate it into Ambitio's database systems.
- Worked with cross-functional teams to build a course recommendation system based on user behavior, improving student engagement on the platform.
- Implemented scalable web scraping solutions while ensuring compliance with data privacy and usage policies.
- Optimized SQL queries and database operations to maintain data consistency and improve performance for high-volume datasets.

Software Developer + Mobile Developer (Datanitiv) 1 June 2026 - Current
Datanitiv

- Engineered scalable enterprise modules by integrating Angular with .NET backend services, architecting complex Stored Procedures (SPs) and RESTful APIs to streamline high-volume database transactions and optimize business logic.
- Led the full-stack reconstruction of the mobile platform, architecting a robust, modular framework from the ground up using React Native and Expo, which established standardized patterns for cross-platform interoperability across Android and iOS.
- Engineered high-performance, native-like mobile experiences by implementing advanced Reanimated-driven UI transitions and custom, global data-loading architectures, ensuring seamless state synchronization and optimized rendering across the entire application ecosystem.

Student Head of IIEC July 2025- Nov 2025
Innovation Incubation Entrepreneurship Cell

- Managed an organization of 50+ members, coordinating large-scale intra-college events and securing high-level government representation.

Projects

AI RTS Tutor | React, Node.js, Socket.IO, Q-Learning Jan 2026 - April 2026

- Architected a novel Human-In-The-Loop AI tutoring system that reframes Q-Learning from a game-playing agent to a real-time instructional system, providing explainable strategic guidance.
- Conceptualized strategy optimization via Markov Decision Process (MDP) and deployed a tabular Q-learning algorithm, achieving 96% decision accuracy in deriving optimal game policies.
- Developed a high-throughput, dual-process architecture that combines a tick-based game engine with a simulation engine to rank tactical actions based on expected cumulative rewards, facilitating rapid policy convergence.

Ocean Hazard Reporting & Social Media Analytics Platform July 2025- April 2026

- Built a full-stack hazard reporting platform using TensorFlow for pattern detection, earning a shortlist in the SIH internal innovation round.
- Created interactive risk visualization dashboards, enabling data-driven safety decisions through real-time social media analytics.

Certifications

- IBM AI Engineering Professional Certificate
- MERN Full Stack Developer (BlackBucks)
- Quantum Computing Certification: **Top 3000 in India**

Skills

Programming: Python, Java, C/C++, SQL, JavaScript.
Data Engineering: Data Extraction, Web Scraping (Selenium, Playwright), API Integration, Database Management, ETL, Data Transformation
Machine Learning/AI: Deep Learning, Numpy, Pandas, Recommendation Systems,Open CV, LangChain.
Full Stack/Frontend: React.js, Node.js, Express.js, MongoDB, HTML, CSS.
Cloud & DevOps: AWS.
Other: Quantum Computing, Event Leadership, Technical & Creative Writing.

- Lead Student of VIT-AP Verse: Directed editorial planning and publishing for the official university magazine.
- Student Coordinator: Managed web content, social media, and event coverage for VIKAS and SEDS teams.
- Newsletter Founder: Spearheaded and edited three editions of the official VIT-AP newsletter.

Languages: English, Hindi, French(Basic).
